Continuous Air Disinfection

PURO Air Aurora
UV Air Fan

Powerful UV Disinfection From Above

The first known miniaturized, high intensity, full-spectrum pulsed-Xenon UV disinfection fixture to be installed in the ceiling or on a wall, Helo fixtures provide unparalleled whole-room surface and air disinfection in any size space, along with the ability to disinfect on demand in one cycle.

Portable UV Disinfection (A)

The Sentry Mobile series provides incredible mobility to help stop the spread of harmful viruses anywhere it's needed. Sentry Mobile units are designed for easy positioning and simple control, and like all PURO Lighting products, emit powerful, full-spectrum UV light to eliminate up to 99.9% of SARS-CoV-2, *E. coli*, Norovirus, MRSA, *C. auris* and *C. diff* in the space.

PUROBOT. Fully Autonomous Disinfection Robot (B)

PUROBOT UV is the fully autonomous, mobile robot that automatically disinfects high traffic areas and shared spaces killing up to 99.9% of SARS-CoV-2, *E. coli*, Norovirus, MRSA, *C. auris* and *C. diff*. All with no toxic chemicals, no specialized crews, and no wait time for employees to re-enter the area. It merges the innovative Fetch Robotics autonomous mobile robot with PURO Lighting's unique full-spectrum, miniaturized ultraviolet lights, powered by Violet Defense technology.

Independent Tests Prove the Aurora Inactivates SARS-CoV-2 up to 99.976% in a Single Pass!

Using UV-C, the PURO Air Aurora provides continuous disinfection of the air to reduce airborne pathogens in occupied spaces. This high-performance air disinfection device includes ozone-free UV-C lamps that lasts up to 18,000-hours. Aurora's very quiet operation is perfect for schools, hospitals and offices, and comes in wall-mounted or mobile versions.

Aurora

Powerful, quiet and proven effective, Aurora disinfects over 5,200 cubic feet of air. Mounted or on a mobile cart, the Aurora is great for schools, healthcare offices and more.

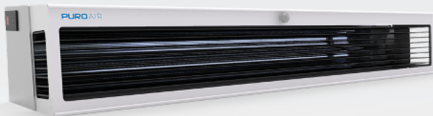

Whisper

Offers 24-hour, continuous air disinfection in occupied spaces, and it's a much quieter and efficient alternative to portable HEPA filter devices.

PURO AIR

Powerful, Continuous Air Disinfection

Cloud

Ceiling or wall-mounted, the Cloud provides powerful upper air disinfection, making it especially great for larger spaces. Schools and universities, hospitals and senior care are ideal locations for the Cloud.

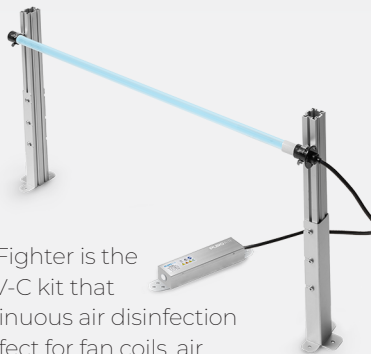

Defender

The small yet powerful solution for continuous air disinfection that's very easy to integrate into existing air systems. Installed inside air ducts, or the final section of an air handling unit, the Defender inactivates viruses, bacteria, mold and spores.

Fighter

PURO Air's Fighter is the compact UV-C kit that makes continuous air disinfection easy. It's perfect for fan coils, air handling units, unit ventilators, PTAC units, and compact AC units.

Now, Add Safety, Reporting and Data Collection to Your PURO UV Disinfection Program.

The PURONet UV Disinfection Control System controls PURO's Helo UV units within your target space to provide extra safe operation as well as data collection on disinfection cycles. The system also records information on the date, time and duration of the cycle, and is accessed on the 10" screen or with a simple hardwired download. The system hardware can also be easily upgraded in the future to access data via the cloud.
